

Installation

You can use the [aescrpts + aeplugins manager app](#) to install and license it in one click.

Otherwise you can install manually by following these steps:

- **The toolsets needs some pseudo-effects to be installed.**
- Please first install these pseudo-effects properly with the installer called "**SpringyFX - PE Installer.jsx**" delivered with the product in the ZIP folder (by running it from the **Run script file** command in the After Effects' **File > Scripts** menu) ;
- **Allow Scripts To Write Files and Access Network** by turning on the corresponding option in your AE **Preferences > General** tab.
- Copy both the "**SpringyFX.jsxbin**" file and the whole "**SpringyFXassets**" folder, then paste them at the same level inside your Application > After Effects' current version > **Scripts > ScriptUI Panels** folder.
- Restart After Effects
- Launch the toolset called "**SpringyFX.jsxbin**" from the **Window** menu and dock the panel wherever you want in your AE's layout.
-

You can watch Video tutorials including a video on how to install under the VIDEOS tab here: <http://aescrpts.com/springy-fx>
