Scribe

Automated write-on typeface library

Installation

Follow these two simple steps to install script:

1. Unpack the archive you have downloaded and copy/paste "Scribe.jsx" to "ScriptUI Panels" folder:

    - Windows: Program Files\Adobe\Adobe After Effects <version>\Support Files\Scripts

    - Mac OS: Applications/Adobe After Effects <version>/Scripts

If folder ScriptUI Panels does not exist, create a folder and name it "ScriptUI Panels". Then paste the copied files into it.

2. Allow script to access network to avoid unnecessary problems while loading GUI. This option is under General tab of After Effects Preference pane:

    - Windows: Edit > Preferences > General

    - Mac: After Effects > Preferences > General

Once Installation is finished run the script in After Effects by clicking Window > Parallel

If you are using After Effects CS3 - CS6, please also make sure to install Pseudo Effect provided with the package. To do that, simply execute "Install PE for Scribe.jsx" and follow on screen instructions.

About

Scribe carries 6 mono-line animation ready fonts that are a perfect pick when you need to animate hand written text.

Select a desired font, enter font size, fill in the text and hit the button - you'll get a shape layer that contains all the letters. Quickly adjust the writing evolution by going to Effects tab and changing the "End" value. Even more, tweak the Stroke size to get the font look that suits you best.

As these fonts are presented as shape paths, you can easily add other generators, like "Repeater", "Gradient Fill", "Offset Paths" and such.

Font List

Bacana by Mariel Gornati www.marielgornati.com.ar
Barcelona Script by Mario Arturo www.marioarturo.herobo.com
Diamor Script by Rhega Juliandy www.creativemarket.com/deadlock
Everlasting by Rhega Juliandy www.creativemarket.com/deadlock
I Love Glitter by Misti Hammers www.mistifonts.com/i-love-glitter
Learning Curve by Jess Latham www.bvfonts.com
